

## 1991 Trek Catalog

This is an extract from the 1991 Trek Catalog. It contains details on the two steel-framed road bikes that Trek made this year: models 520 and 400.

Page 3 contains the specs. for these bikes as well as those for the other road bikes Trek produced in 1991. Page 4 contains the specs. for Mountain and Multi-track bikes from 1991. The colors for the various bike models are listed in the table at the end of this document.

All of the pages can be enlarged to see more detail.

# 520 Cro-moly Touring

Trek's Road Cro-moly bicycles are carefully crafted bicycles that go a long way in performance. Their brazed Cro-moly construction results in a strong, rigid, precisely aligned frame that offers long-lasting quality, fun and value. ■ The 520 is designed with long distance touring in mind. The special geometry of the frame creates directional stability while loaded and offers ample clearance for panniers and fenders. The Shimano Deore DX components and the triple crank assure smooth operations under the stress encountered when touring. ■ The 520 Cro-moly is a quality cycle that will provide you with long-term cycling performance and enjoyment.
